

# AIRx MIRACOIL

## Airconditioner Coil Cleaner

**Miraculous cleaner & renovator for air conditioning coils, fins & filters**

**AirX Miracoil** removes corrosion, dirt, greasy soil, dust, lint & atmospheric deposits. Improves heat transfer efficiency & reduces energy consumption.

Air conditioning & refrigeration systems fail more frequently because they are not clean, than because of mechanical problems. Even when the cause is mechanical, it's apt to be a result of dirt & corrosion reducing the efficiency of the unit so that it is forced to run too frequently.

**AirX Miracoil** can decrease the running cost of your air conditioner by up to 35%.

### Product features

#### RETARDS FUTURE CORROSION BEFORE CLEANING

- Dirt & corroded coils reduce heat transfer. A dirty unit works harder & wastes energy. Overworked motors & compressors are subject to unnecessary destructive wear.

**CLEANING IS EASY** - Just spray on with a garden style sprayer. Foam penetrates deep into the coil bank to loosen dirt, greasy soil, etc. & bring it to the surface. High pressure or brushes that might bend delicate fins are not necessary.

**AFTER CLEANING** - Coils are clean and the aluminum fins are smooth and bright, and will stay that way. Customers report improvement of 50% to 80% in heat transfer efficiency. Savings in energy are immediately evident by less frequent running of the motor and compressor.

# AirX Miracoil Airconditioner Coil Cleaner

**Miracoil** is a blend of corrosion inhibited acids, synthetic detergents, wetting agents & polar solvents made specifically for exterior cleaning of air conditioning, refrigeration & air handling systems of all types & sizes.

## Benefits

- **CLEANS** - **Miracoil** removes dirt, dust, industrial fall out, air borne sales, lint, grass clippings and other obstructions.
- **PENETRATES** - **Miracoil's** foam penetrates deep into the coil bank to loosen dirt and pull it to the surface.
- **DEOXIDIZES** - **Miracoil** removes 'white rust' corrosion from aluminum fins & tarnish from copper coils.
- **RETARDS PITTING** - Cleaned surfaces stay bright & smooth even longer than they did originally.
- **INCREASES EFFICIENCY** - Periodic cleaning improves heat transfer & cooling efficiency.
- **SAVES ELECTRICITY** - Motors & compressors need to run less frequently when units are cleaned with this miraculous product.
- **ELIMINATES DOWN TIME** - 1. Coils can be cleaned in place.  
2. Regular cleaning reduces breakdowns.
- **NOT HARMFUL TO AIRCONDITIONERS** - Laboratory tests confirm that weight loss of typical aluminum fins is only 1% after cleaning. Will not lead to metal fatigue.
- **PROLONGS LIFE OF EQUIPMENT** - More units break down because they are not cleaned than for any other reason.
- **EASY TO USE** - Just spray on & rinse off.
- **ECONOMICAL** - **Miracoil** is a concentrate that can be diluted with water for routine use.
- **SAVES LABOR** - Works fast. Cleans units in place.
- **NOT DANGEROUS TO COMMON SURFACES** - **Miracoil** will not attack plastic, rubber, paint, tile floors or carpeting.
- **NON-FLAMMABLE** - **Miracoil** will not burn or support combustion in its liquid or vapor form.
